## SUMMARY

---

I am a behavioral economist interested in interdisciplinary research on group and individual decision making. In particular, I explore topics such as collective intelligence, forecasting and individual preferences through economic experiments and empirical analysis.

## CURRENT POSITIONS

---

### PhD Candidate in Human Decisions and Policy Design

*Sep 2019 - Present*

*Maastricht University, The Netherlands*

- Pursue experimental research on collective intelligence, forecasting and individual preferences.
- Equip future problem solvers with an economic toolbox by teaching various PBL-based courses.

### Co-Founder

*Sep 2019 - Present*

*Bat & Ball, Berlin, Germany*

- Build a consulting firm dedicated to transform scientific insights into real-world solutions.

## ACADEMIC VISITS

---

### Visiting Graduate Student

*Sep 2022 - Jan 2023*

*University of California, San Diego - Rady School of Management, USA - Host Uri Gneezy*

## RESEARCH PAPER

---

### Mitigating manipulation in committees: Just let them talk! - [link to paper](#)

- I analyse how the format of interaction and threats of manipulation influence the accuracy and trustworthiness of judgments derived in small groups such as expert committees or project teams.

### Debt Aversion: Theory and Measurement (with Thomas Meissner) - [link to paper](#)

- We propose a formal model incorporating debt aversion as standalone domain of preferences, and use a novel experiment to jointly estimate debt aversion with preferences over time, risk and losses.

### The Debt Aversion Survey Module: An experimentally validated tool to measure individual debt aversion (with Thomas Meissner) - [link to paper](#)

- We develop an experimentally validated, short and easy-to-use survey module for measuring individual preferences towards saving and borrowing, as if elicited through an incentivized experiment.

## ONGOING RESEARCH

---

### Debt aversion among German households - Evidence from the SOEP

(with Thomas Meissner and Ciril Bosch-Rosa)

- We investigate the relation of individual debt attitudes to other socio-economic characteristics and its predictive power for real-world behavior based on a German representative sample.
