SUMMARY

I am a behavioral economist interested in interdisciplinary research on group and individual decision making. In particular, I explore topics such as collective intelligence, forecasting and individual preferences through economic experiments and empirical analysis.

CURRENT POSITIONS

PhD Candidate in Human Decisions and Policy Design

Sep 2019 - Present

Maastricht University, The Netherlands

- Pursue experimental research on collective intelligence, forecasting and individual preferences.
- Equip future problem solvers with an economic toolbox by teaching various PBL-based courses.

Co-Founder

Sep 2019 - Present

Bat & Ball, Berlin, Germany

- Build a consulting firm dedicated to transform scientific insights into real-world solutions.

ACADEMIC VISITS

Visiting Graduate Student

Sep 2022 - Jan 2023

University of California, San Diego - Rady School of Management, USA - Host Uri Gneezy

RESEARCH PAPER

Debt Aversion: Theory and Measurement (with Thomas Meissner) - [link to paper](#)

- We propose a formal model incorporating debt aversion as standalone domain of preferences, and use a novel experiment to jointly estimate debt aversion with preferences over time, risk and losses.

The Debt Aversion Survey Module: An experimentally validated tool to measure individual debt aversion (with Thomas Meissner) - [link to paper](#)

- We develop an experimentally validated, short and easy-to-use survey module for measuring individual preferences towards saving and borrowing, as if elicited through an incentivized experiment.

ONGOING RESEARCH

Hidden Agendas in Small Group Judgment Aggregation - [link to preregistration](#)

- I analyse how the format of interaction and threats of manipulation influence the accuracy and trustworthiness of judgments derived in small groups such as expert committees or project teams.

Debt aversion among German households - Evidence from the SOEP

(with Thomas Meissner and Ciril Bosch-Rosa)

- We investigate the relation of individual debt attitudes to other socio-economic characteristics and its predictive power for real-world behavior based on a German representative sample.
