## SUMMARY

I am a behavioral scientist interested in generating and applying data-driven insights on questions related to economics and decision-making. My research explores topics such as economic preferences and group behavior using meta- and crowdscience approaches, experiments, surveys, structural estimations, Bayesian statistics, and machine learning.

## RESEARCH PAPERS

### **Mitigating manipulation in committees: Just let them talk!** Job Market Paper

I analyze how the format of interaction and threats of manipulation influence the accuracy and trustworthiness of judgments derived in small groups such as expert committees or project teams.

### **Debt Aversion: Theory and Measurement** (with Thomas Meissner)

We propose a formal model incorporating debt aversion as a genuine domain of preferences and use a novel experiment to jointly estimate debt aversion with preferences over time, risk, and losses.

### **The Debt Aversion Survey Module: An experimentally validated tool to measure individual debt aversion** (with Thomas Meissner)

We develop an experimentally validated, short and easy-to-use survey module for measuring individual preferences towards borrowing.

## **ONGOING RESEARCH**

### **#ManyDaughters: Multi-Analyst Project Exploring the Effect of Daughters on Preferences and Behaviors** (with Aurélien Baillon, Anna Dreber, Frank M. Fossen, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Séverine Toussaert, Yifan Yang)

We collect pre-analysis plans and analysis code from 100+ research teams testing hypotheses about the impact of having daughters on attitudes, preferences, and behaviors.

### **Expanding Moral Wiggle Room: A Large-Scale Online Replication and the Role of Moral Context** (with Hande Erkut, Jakob Möller, Magnus Johannesson, and Levent Neyse)

We replicate and extend the influential research on “moral wiggle room” demonstrating how reduced transparency in dictator games enables self-interested behavior through willful ignorance.

### **#ManyLabs-DACH: A Multi-Lab Study across Germany, Austria, and Switzerland** (with Cankut Kuzlukluoğlu, Anna Dreber, Felix Holzmeister, Magnus Johannesson, Levent Neyse)

We collect data from 20+ German-speaking labs and representative (online) samples to assess and quantify population heterogeneity in treatment effects of crowdsourced experimental designs.

### **Lab<sup>2</sup> Many Labs study—ML<sup>2</sup>** (with Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse and Séverine Toussaert)

We collect data from 50+ labs to provide high-powered tests of key methodological issues in experimental economics, estimate heterogeneity in treatment effects, and replicate seminal findings.

## **CONTRIBUTION TO CROWDSCIENCE PROJECTS**

### **Examining the generalizability of research findings from archival data** (Andrew Delios, Elena Giulia Clemente, Tao Wu, Hongbin Tan, Yong Wang, Michael Gordon, Domenico Viganola, Zhaowei Chen, Anna Dreber, Magnus Johannesson, Thomas Pfeiffer, Eric Luis Uhlmann) **Proceedings of the National Academy of Sciences**, 2022
