SUMMARY

I am a behavioral economist with professional experience in consulting, interested in generating and applying data-driven insights on questions related to economics and decision-making. My research explores topics such as economic preferences and group behavior using meta- and crowdscience approaches, experiments, surveys, structural estimations, Bayesian statistics, and machine learning.

CURRENT POSITION

Postdoctoral Researcher / Research and Lab Coordinator

since Oct 2024

Berlin Social Science Center (WZB) - Markets & Choice Research Department

Lab² - Incubator for replicability, meta- and crowdscience, Prof. Dr. Anna Dreber & Dr. Levent Neyse

EDUCATION

PhD in Human Decisions & Policy Design (Economics)

2019 - 2024

Maastricht University, Netherlands

M.Sc. in Economics and Management Science (MEMS)

2014 - 2017

Humboldt University, Berlin, Germany

Thesis: Probability Perception in Decision Making under Risk

B.A. in Economics and Sociology

2011 - 2014

Georg August University, Göttingen, Germany

RESEARCH PAPERS

Mitigating manipulation in committees: Just let them talk! Job Market Paper

I analyze how the format of interaction and threats of manipulation influence the accuracy and trustworthiness of judgments derived in small groups such as expert committees or project teams.

Debt Aversion: Theory and Measurement (with Thomas Meissner)

We propose a formal model incorporating debt aversion as a genuine domain of preferences and use a novel experiment to jointly estimate debt aversion with preferences over time, risk, and losses.

The Debt Aversion Survey Module: An experimentally validated tool to measure individual debt aversion (with Thomas Meissner)

We develop an experimentally validated, short and easy-to-use survey module for measuring individual preferences towards borrowing.

ONGOING RESEARCH

#ManyDaughters: Multi-Analyst Project Exploring the Effect of Daughters on Preferences and Behaviors (with Aurélien Baillon, Anna Dreber, Frank M. Fossen Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Séverine Toussaert, Yifan Yang)

We collect pre-analysis plans and analysis code from 100+ research teams testing hypotheses about the impact of having daughters on attitudes, preferences, and behaviors.

 ${f Lab^2\ Many\ Labs\ study}$ — ${f ML^2}$ (with Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse and Severine Toussaert)

We collect data from 50+ labs to provide high-powered tests of key methodological issues in experimental economics, estimate heterogeneity in treatment effects, and replicate seminal findings.

Debt aversion among German households (with Thomas Meissner)

We investigate the relation of individual debt attitudes to other socio-economic characteristics and its predictive power for real-world behavior based on a German representative sample.

Expanding Moral Wiggle Room: A Large-Scale Online Replication and the Role of Moral Context (with Hande Erkut, Jakob Möller, Levent Neyse)

We replicate and extend the influential research on "moral wiggle room" demonstrating how reduced transparency in dictator games enables self-interested behavior through willful ignorance.

CONTRIBUTION TO CROWDSCIENCE PROJECTS

Examining the generalizability of research findings from archival data (Andrew Delios, Elena Giulia Clemente, Tao Wu, Hongbin Tan, Yong Wang, Michael Gordon, Domenico Viganola, Zhaowei Chen, Anna Dreber, Magnus Johannesson, Thomas Pfeiffer, Eric Luis Uhlmann)

Proceedings of the National Academy of Sciences, 2022
