SUMMARY

I am a behavioral economist interested in interdisciplinary research on group and individual decisionmaking. In particular, I explore topics such as collective intelligence, forecasting, and individual preferences through economic experiments and empirical analysis.

CURRENT POSITION

PhD Candidate in Human Decisions and Policy Design

Sep 2019 - expected Feb 2024

Maastricht University, The Netherlands

Supervisors: Alexander Brüggen, Martin Strobel, and Thomas Meissner

- Pursue research on collective intelligence, forecasting, and individual preferences.
- Utilize experimental methodology, experimetrics, structural estimations, Bayesian statistics, and machine learning to uncover intricacies of human behavior
- Equip future problem solvers with an economic toolbox by teaching various PBL-based courses.

ACADEMIC VISITS

Visiting Graduate Student

Oct 2023

Technische Universität Berlin, Germany - Host Prof. Dr. Frank Heinemann

Visiting Graduate Student

Sep 2022 - Jan 2023

University of California, San Diego - Rady School of Management, USA - Host Uri Gneezy

RESEARCH PAPERS

Mitigating manipulation in committees: Just let them talk! - link to paper

• I analyze how the format of interaction and threats of manipulation influence the accuracy and trustworthiness of judgments derived in small groups such as expert committees or project teams.

Debt Aversion: Theory and Measurement (with Thomas Meissner) - link to paper

• We propose a formal model incorporating debt aversion as a genuine domain of preferences and use a novel experiment to jointly estimate debt aversion with preferences over time, risk, and losses.

The Debt Aversion Survey Module: An experimentally validated tool to measure individual debt aversion (with Thomas Meissner) - link to paper

• We develop an experimentally validated, short and easy-to-use survey module for measuring individual preferences towards saving and borrowing, as if elicited through an incentivized experiment.

ONGOING RESEARCH

Debt aversion among German households - Evidence from the SOEP (with Thomas Meissner and Ciril Bosch-Rosa)

• We investigate the relation of individual debt attitudes to other socio-economic characteristics and its predictive power for real-world behavior based on a German representative sample.
